

# pdfAutoOptimizer

**The new benchmark for standards-compliant transparency flattening**

The use of transparency has added a great deal of creative freedom to designers. Unfortunately, few production systems can properly handle transparency. **callas pdfAutoOptimizer 2** fully automatically flattens files, handling both CMYK and spot colors, while keeping most raster, vector and text elements intact, maintaining flexibility in design and safeguarding past investments.

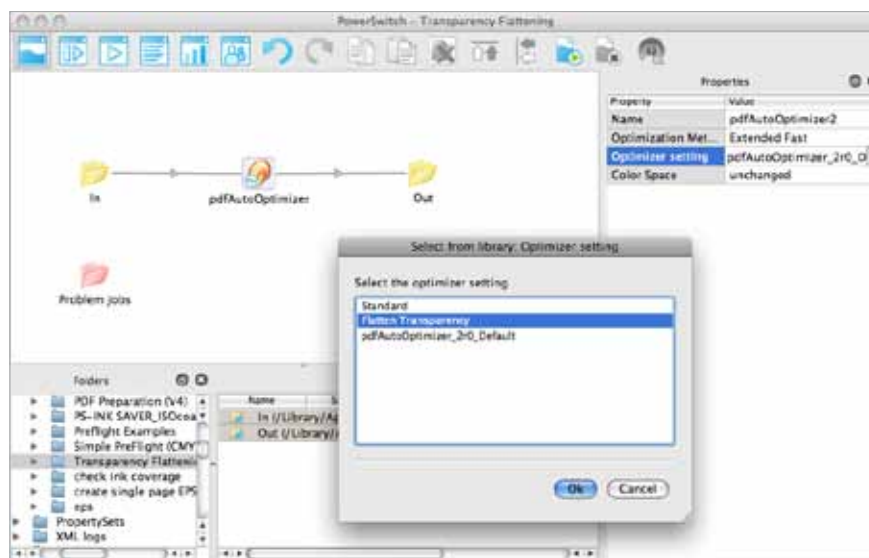

# The new benchmark for standards-compliant **transparency flattening**

## Benefits

- Save time by automating PDF flattening
- Allows printers and publishers to accept files with transparencies without having to upgrade their entire output infrastructure
- Low investment in professional software prevents large investments for equipment update or replacement. Ideal pre-output specific conversion as far back as possible in the production process
- Reduce error levels by letting designers focus on design instead technical aspects of PDF delivery
- Enables designers to create one unflattened PDF master and deliver standards-compliant PDFs according to the supplier's needs

## Key Features

- Highest quality live transparency flattening
- Handles drop shadows and masks, in both process color and spot color pages
- Real flattening of objects instead of just turning a complete page into an image
- Setting of blend color space used for transparency flattening. No forced conversions of spot colors to CMYK
- Powerful color control, allowing removal of ICC profiles introduced during flattening
- Improved JPEG compression handling to reduce artifacts
- Professional automation capabilities
- Make PDFs compliant with PDF/X standard -even PDFX/4- and get files ready for GWG recommendations
- Automate and perfect functions of Adobe Acrobat 8.1 Professional and 9 Pro's PDF Optimizer tool including image optimization, file size reduction and removal of unneeded elements
- Easy integration with leading workflow solutions such as Enfocus Switch

### System requirements

- Adobe Acrobat Professional 8.1 or 9 Pro  
(use with Adobe Acrobat Standard 8 or Adobe Acrobat Reader not supported)
- Windows 2000/2003/XP/Vista/7 - Switch and Acrobat version
  - Mac OS X (version 10.4 and newer) - Switch version only
  - Enfocus Fullswitch or PowerSwitch - Switch version only
